

Colour: grey

**i.COMPOSITE** is a two component MS-polymer based adhesive providing a complete hardening between airtight surfaces. Full load-bearing capacity already after 4 hours!

The water resistant adhesive, for indoor and outdoor use, is ideal for the adhesion of airtight surfaces.

#### Suitable for use with:

- ✓ Ceramics, natural and artificial stone
- ✓ Steel, stainless steel, aluminium, brass and copper
- ✓ Painted materials and coated surfaces
- ✓ Glass, mirrors
- ✓ and many others

**WORLD FIRST:** As an optimal accessory product, we offer our unique 2K-pouch i.MIX (Patent pending)!

## APPLICATION EXAMPLES

- Mounting of bathroom accessories (towel racks, toilet paper holders, mirrors, soap dishes, shower rail)
- dispenser systems for use in commercial or public areas (soap dispensers, paper towel dispensers)
- Bathroom and toilet equipment (Safety and holding rails)
- Installation of shower- or cubicle separating walls (wall profiles, floor profiles)
- Bathroom furniture, mirrored cabinets

## PRODUCT QUALITIES

- + Very rapid hardening time of 4 hours
- + Adhesion of airtight surfaces
- + Water-, weather- and aging-resistant
- + High temperature resistance
- + No mould formation typical of drilled holes
- + Removal without any residues or damage
- + EU REACH conformant
- + No hazard labeling needed
- + Vibration-resistant, noise-insulating and stress-equalising

**General advise:** The bonding surface must be clean, free of oil and dust and able to bear weight. For pre-cleaning we recommend our i.CLEANER. Please find more details in its technical data sheet and safety data sheet.
