

i.GLUESYSTEMS mounting plates enable the non-drilling fastening of objects which, based on their structure (weight, size, contact surface) cannot or should not be directly glued.

i.GLUESYSTEMS standardised stainless steel mounting plates with integral threaded bolts and locking nuts are available in sizes M4 to M8.

**Round:**

Ø 30 mm; Plate thickness 1,0 mm; press-in threading bolts M4 x 15  
 Ø 40 mm; Plate thickness 1,5 mm; press-in threading bolts M6 x 10  
 Ø 50 mm; Plate thickness 1,5 mm; press-in threading bolts M8 x 10

**Square:**

40 x 20 mm; Plate thickness 1,0 mm; press-in threading bolts M4 x 10

We do also offer customized solutions and according to individual needs and requirements. Please contact us with your specific need and we will find an optimized solution for you.

**APPLICATION EXAMPLES**

**PRODUCT QUALITIES**

- Wall brackets
- Dispenser systems
- Lamps
- cable ducts
- bells, post boxes, paintings, house numbers e.t.c.
- Sanitary solutions e.g. shower sets, pipe clamps, shower enclosures

- + For interior and exterior use
- + Non-destructive and clean assembly process
- + Removal without any residues or damage
- + No wiring, waterpipes or insulation damage
- + Prevention of thermal bridges
- + No mould formation typical of drilled holes

**General advise:** The bonding surface must be clean, free of oil and dust and able to bear weight. In the case of adhesions between air-tight surfaces, moistening of the adhesive mass is necessary. For pre-cleaning and humidification we recommend our i.CLEANER. Before final assembly of the product, observe the curing time of the respective adhesive!
