**Entry in the TÜV Rheinland Building Materials List of January 2016 for  
i.GLUESYSTEMS GmbH. Product: i.CRYSTAL**

Dear Sir or Madam,

We are happy to confirm that the Product i.CRYSTAL is included in our TÜV Rheinland material list.

The material list represents an overview of highly-recommended construction products which contribute to a healthy indoor climate. This list is developed, maintained and updated regularly only by TÜV Rheinland Energy GmbH.

This material list includes an extensive number of highly-recommended low-emission building products and materials both for shell construction as well as interior design, with a clear focus on building products for interior design.

New products are added in compliance with criteria upon successful verification. Products that are no longer on the market, or no longer fulfill the admission criteria due to new information about toxic properties are removed from the list. This material list includes products that have been separately checked without contact to other materials. Products whose composition has been changed are checked.

Products of the material list which are used according to the state of technology and the manufacturer's instructions contribute positively to a low-emission climate.

The entry in the material list does not entitle to represent the TÜV Rheinland Signet on the product. This requires further tests.

Best regards

TÜV Rheinland Energy GmbH
